SUMMARY

Data Scientist and ML Engineer with hands-on experience building predictive models, NLP systems, AI-powered applications, and gaming analytics platforms. Proficient in Python, machine learning, deep learning, and AI frameworks with a strong foundation in turning complex data into actionable insights across fintech, gaming, and enterprise domains.

EXPERIENCE

ML Engineer Intern <i>Iolite Technologies</i>	October 2025 – Present Bangalore, India
- Built an intelligent Admission Analytics dashboard improving decision efficiency by approximately 30% with predictive insights. - Developed a fully autonomous marks verification system using Mistral OCR3 + GPT-4, eliminating manual verification and reducing processing time by approximately 60% while improving accuracy.	
Data Analyst Intern <i>HSBC Data Processing Centre</i>	January 2023 – May 2023 Bangalore, India
- Worked with the Global COE Team to build ML models to optimise prediction of HSBC stock prices. - Delivered a model with RMSE of 0.4 to support informed buy/sell decisions, improving financial outcomes.	
Assistant System Engineer (ML) <i>Tata Consultancy Services</i>	July 2019 – August 2020 Bangalore, India
- Reduced user errors in purchase orders by 30% using a Recommendation Engine and error pattern analysis. - Assisted in designing a data pipeline architecture (team of 5) that scaled a new product to 100,000 daily active users.	

EDUCATION

Christ (Deemed to be Univ.), Bangalore <i>MSc AI and ML – CGPA: 3.55/4.0 Coursework: Deep Learning, NLP, Time Series, LLMs</i>	India 2025 – 2027
Christ (Deemed to be Univ.), Bangalore <i>MSc Data Science – CGPA: 3.55/4.0</i>	India 2021 – 2023
Christ (Deemed to be Univ.), Bangalore <i>B.Tech in Computer Science Engineering – CGPA: 9.45/10.0 Coursework: Algorithms, OS, Data Structures</i>	India 2015 – 2019

PROJECTS

PlayerPulse <i>Python, FastAPI, React, XGBoost, Monte Carlo</i>	Live GitHub 2026
- Built a gaming analytics platform with a Monte Carlo slot engine processing 1M+ spins in under 2s, optimising RTP, hit frequency, and volatility while generating synthetic player datasets. - Developed an XGBoost churn prediction pipeline (68.5% accuracy) and an A/B testing framework simulating 40% lower churn, improving ARPU and LTV for player retention.	
SentinelX: Graph AI Fraud Intelligence Platform <i>Python, GAT, XGBoost, Streamlit</i>	Live GitHub 2026
- Built a real-time fraud detection platform using Graph Attention Networks, XGBoost, and anomaly detection to identify bots, collusion rings, and multi-account abuse with 98% F1-score and 0.5ms latency. - Engineered a player intelligence engine using PageRank, Louvain community detection, and behavioral entropy across 1,500+ players; built a BI dashboard modelling \$25K+ weekly revenue protection.	

TECHNICAL SKILLS

Languages: Python (NumPy, Pandas, scikit-learn)
Frameworks & Libraries: Hugging Face, PyTorch, TensorFlow, FastAPI, Streamlit, Docker, LangChain, LangGraph
Domain (ML/DL): Computer Vision, NLP, Machine Learning, Sports Analytics, LLMs, Graph AI (GAT, PageRank, Louvain)
Gaming & Simulation: Monte Carlo Simulation, Slot Machine Statistics (RTP, Hit Frequency, Volatility, ARPU, LTV)
Version Control: GitHub

CERTIFICATIONS & ACHIEVEMENTS

Certifications:
[Fundamentals of Accelerated Computing with CUDA Python](#) | NVIDIA | Apr 2026
[Developing LLM Applications with LangChain](#) | DataCamp | Nov 2025
[Time Series Analysis in Python](#) | DataCamp | Nov 2025
[Python for Data Science](#) | Infosys Springboard | Aug 2025

Awards & Honours: Gold Medal, Silverzone Mathematics Olympiad (2014) | Silver Medal, Information Science Olympiad (2014)
Sports: College Football Representative (2016–2018) | Gold Medal, Inter-Dept Cricket | Silver Medal, Inter-Dept Football
